

# Absorbent rolls

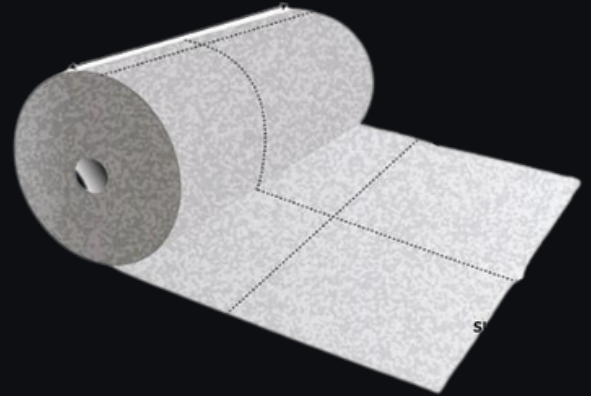

## Hexadin

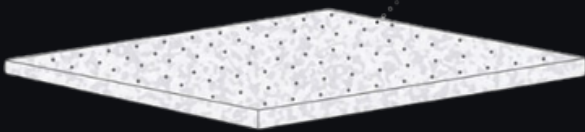

Made of  
polypropylene fibre,  
for proper  
absorption of  
pollutant liquids.

## Features

*Universal absorbent rolls, made entirely of pure polypropylene, are excellent for rapid ground absorption of all polluting liquids, including hydrocarbons, petrol, diesel, solvents, thinners, paints and water-based liquids.*

*The rolls are available in different thicknesses and formats, and each provides a different absorption capacity, directly proportional to the thickness.*

## Technical Data

- Calendered with binding points
- Absorption capacity in accordance with EDANA standards
- Easy handling thanks to pre-cuts in width and length
- Storage life: unlimited if stored well away from UV radiation

The product is subject to the legislation in force for the disposal of the absorbed substance.
