Industrial Absorbents. Superior performance and quality assured.

Improve workplace safety with spill control absorbents.

INDUSTRIAL ABSORBENTS

- Absorbents for Hydrocarbons: Made of highly absorbent polypropylene used for spills of liquids such as oils or fuels on surfaces.
- Chemical Absorbents: Manufactured for the rapid and effective absorption of chemicals.

- Anti-linting, where the absorbent does not release lint or particles that contaminate the manufacturing process or damage machinery.
- 100% pure polypropylene.
- Easy and fast, very high absorption capacity.
- Absorbent of: Acids, alkalis, hydrocarbons and water.
- Double thickness, perforated in width/length, top reinforcement.

RELATED PRODUCTS

2 ABSORBENT SOCKS 5MX13CM OUTDOOR USE

- Made from 100% Polypropylene.
- Designed for a quick response marine environments or on land during rainfall.
- Suitable for absorbing and containing oils in rivers, lakes, harbours, the sea, etc.
- Rings and carabiners for fast connection.

200 ABSORBENT PADS - REGULAR THICKNESS 40X50 CM

- Pre-cut hydrocarbon absorbent sheets.
- Used for cleaning and collecting minor spills on machinery due to their high liquid absorption capacity.
- Made from 100% Polypropylene, easy and quick to use with a very high absorption rate.
- Absorbs hydrocarbon-based liquids and repels water.

2 REINFORCED ABSORBENT ROLLS 40CMX40M

- Designed with double reinforcement for cleaning and collecting minor spills.
- Made from 100% Polypropylene.
- Easy and quick to use with a high absorption capacity.
- For hydrocarbon-based liquids; water-repellent.
